

EDUCATIONAL INSTITUTIONS

Rating Methodology

ducationalinstitutions (Els) fall into the service sec tor, and thus their rat ing is based upon their own pe culiar pa rame ters. Along with the quantitative factors, qualita tive fac tors also play a de cid ing role in the over all rating of Els. Apart from analyzing the overall edu cational sector, the in stitution's man age ment and fran chise value, its long-term strate gies, its competi tive situa tion/strength and its financial standing needs to be considered.

Demand for education is greatly dependent on the population, popula tion growth rate and lit er acy rate of the coun try. Due to the high popula tion growth rate in developing coun tries, there is almost al ways a defi cit in the demand-supply situation in this sector.

Sup port of the gov ern ment towards im parting quality education de pends on its abil ity to al lo cate funds for this pur pose. Where the gov ern ment's ef forts fall short, the pri vate sec tor fills the vac uum. However, where the public sector edu ca tion is strong, the pri vate sector will have to show higher qual ity and a higher de mand track record. to tal/partial control over the gov

Gov ern ment regulations also determine the barriers for entry particularly for the private sector. An active edu cation policy pursued by the government generally ensures that Els conform to the laid down stan dards lead ing to greater as sur ance of continuity. A gov ern ment's re laxed stance towards pri vate sector in volve ment may sometimes lead to sub standard fa cili ties. How ever, even small schools may play an im portant role in fill ing the gap be tween supply-demand for edu ca tion in the country.

Els may be organizedunder many differ ent regula tions such as laws gov erning com panies, trusts, so cie ties or part ner ships. Each law adds vary ing risk with re gards to continuity, growth and financial sup port in times of needs. The abil ity of the EI to han dle and meet the vari ous regula tory require ments is a fac tor con sid ered while rating.

Els can be spon sored by a large phil an thropic group, community, trust, in di vidu als, and limited liability companies or they may come under the public sector where the gov ern ment ex er cises

1

ern ance of the El. Each of these means of spon sor ships has varying de gree of strengths which contrib ute to the over all credit rating of the in stitution.

Goals of each of these sponsors may differ. Objective of opening Els by the govern ment, community, trust is more to wards impartingeducation in general. These sponsors nor mally subsidize education. Annual funds allocation over the years along with the funding of any extraor dinary expenditure is analyzed to see how large expenses will be managed and provided for in the future.

Cor po rate struc ture of the institution is examined to determine the de pend ence of the EI on its

Cor po rate struc ture of the in stitution is examined to de ter mine the de pend ence of the EI on its spon sors. It is most likely that the rat ing of an EI may be in flu enced by the rat ing of the spon sor(s) un less the institution is run in dependently of the spon sor's in volve ment

spon sors. It is most likely that the rat ing of an EI may be in flu enced by the rat ing of the spon sor(s) unless the in sti tu tion is run in de pend-

ently of the spon sor's in volvement.

Abil ity of the man age ment to deal with ex ter nal threats and to capitalize on opportunities is important. While analyzing the strategies and plans of El, it is also im portant to de velop a view of the depth and ex perience of the El's man age ment team and the adequacy of the succession plan of the top man age ment. It is very important that the vision and strategies of the top management is effectively passed down in the organizational hierarchy. Level of

faculty satisfaction is determined by their turn over rate. Mo ti vation level of faculty is judged by their dedication and en thus i asm to convert the El's goals and objectives into reality.

An im por tant as pect to look at is the clarity, efficacy and efficiency of the rules, pro ce dures and sys tems of gov ern ance in the EI. Well-documented sys tems and well in te grated IT sys tems will lead to efficient operations. Quality of internal audit is determined by the fre quency and depth of audit reports within the in sti tu tion. ISO 9001:2000 quality management system certification, if obtained by an El will indicatewell-managed systems and controls. In spection of man age ment prac tices is also a cru cial quality control measure.

The cur ricu lum holds prime importance. The internal system to re search on, re vise and modern ize the cur ricula to be in line with changing needs of the so ciety for future success of the institution is examined. Determining the adequacy and scope of the cur ricula and its effective ness and proper

implementation is judged by the students' performance during exams and

Number of credit trans fers to for eign Els es tab lish the rec og ni tion which an El en joys and re in forces the edu cation stan dard of the El. Teach ers' re cruit ment pro cess and their train ing pro grams also play a vital role in main tain ing the qual ity of edu cation

in practical life after they have completed education. Number of credit trans fers to for eign Els estab lish the recognition which an El en joys and rein forces the education standard of the El. Teach ers' recruit ment process and their

train ing pro grams also play a vi tal role in main tain ing the qual ity of edu cation. Quality of entrance tests and the whole process of students' in duction in the El de termines the quality of students en rolled. The minimum academic per form ance (ex ample GPA) expected from each student through out the academic year is also a determinant of student quality maintenance.

Operating performance is meas ured against the in stitution's mis sion state ment. Growth in terms of the number of stu dents, teach ers, branches, differ ent courses/cur ricu lums of fered, etc is seen. De mand for ad mis sion will de ter mine the fran chise value that the El has de vel oped over the years and in di cates its potential to at tract en roll ment in the future. The de mand de vel ops be cause of the aca demic achieve ments of students in the El. Lo ca tion holds sig-

in de termining the amount of competition and

nificance

as cer tain ing the de mand and expected de mand growth in the area. Criti cal is the abil ity of the El to de velop a niche mar ket for itself.

The in flu ence of staff un ions, stu dent bod ies and par ent-teacher as so cia tion on the man age ment to meet its qual ity ob jec tives along with its fi nan cial sus tain ability is as certained. This may help determine the importance placed on the quality of edu cation vs. its growth.

Historical financial performance is analyzed through time series trends and common-size state ments. Budgets are compared to actual performance in order to high light the accuracy of management's forecasts.

Growth in in come will come from two ar eas - first, growth in the number of stu dents and second, abil ity to in crease fee in the future. Here, the man age ment strategy and plans for ex pan sion will play a role. Growth in fee rate must be ana lyzed by the abil ity of the tar get mar ket to ab sorb the increase.

Em pha sis on cost con trols is im por tant. A ma jor run ning cost of an edu ca tional in sti tu tion is the teach ing and non-teaching staff sala ries which in crease with the stu dent growth. Most of the other costs do not vary with ca pac ity. The de gree of con trol on these expenses is an im por tant rat ing consideration.

Net cash from core op era tions and the cash flow cy cle needs to be moni tored care fully to en sure timely debt prin ci pal and in ter est payments. Adequate capitalization and level of in vest ment are analyzed. A high debt lever age and cost of debt may greatly limit financial flexibility and may also dry out additional/new sources of funds.

El's as sets are mostly il liq uid since it is much more dif fi cult to close a school and sell the business in its run ning con di tion. As a result, if fixed as sets of an El are val ued for pur poses of mort gage, the fair value should have a high dis count be cause of the il li quid ity factor.

By na ture of their activity, Els may have a large amount of security de posit li abilities which are taken from stu dents at the time of admission. These are non-interest-based li abilities which have no fixed term of repay ments. Gearing is a better ratio in comparative analysis of Els.

Newlyestablishedinstitutions are more prone to competition than well-established public and pri vate in sti tu tions. In case of a large branch net work, ini tial losses and costs of open ing new branches can be easily ab sorbed by the other profit-making branches. Profitable operations of large net works also con firm the management's ability to admin ister in ter nal con trols within its operations. Large profitable net works also, to some ex tent, con firm the quality main tenance of the in stitution and its fran chise value. One way a stand-alone in sti tu tion can com pete with a large branch network, at least in ob tain ing a comparable rating, is its longstanding his tory of op er at ing perform ance and a higher fran chise value.

Important Rating Considerations

Management

- ◆ LegalStructure
- Quality and stability of management
- Long term vi sion and objectives for the institution
- ◆ Decision making process
- Policy planning and implementation procedures
- ◆ Succession planning
- Level of documentation (ac counting and other procedures)
- ◆ Ade quacy of internal audit
- In spection of Teaching practices/management audits

Academicfactors

- ◆ Ade quacy of the curricu lum and its fre quency of re vi sion
- Emphasis on extra-curricular
- Minimum qualifications of teach ers and em pha sis on teacher training
- Diversity of education provided by the in stitution
- Admission policy (age limitations, class en roll ment limitations, courses limitations)
- ◆ Teacher-student ratio
- ◆ Fran chise value as de ter mined by the past growth and the future de mand for en roll ment in the institution
- Emphasis on information technology in the curriculum
- Degree of parents' involvement

Operatingperformance

- Sources of revenue and stability and quality of earnings
- Stu dent and teacher growth over the past few years
- ◆ Fee struc tures; fee growth during the past and ex pected in the future
- ◆ Sources of future growth
- ♦ Abil ity to ab sorb losses
- Source of fu ture growth in revenue
- ◆ Operatingefficiency

Asset quality

- Growth in as sets
- Capital expenditure require ments and expected pay back periods
- Forced sale value/realisable value of assets

Capitalstructure

- ◆ Existing capital structure
- Ma jor source of fundingpresent and future
- Contingent liabilities and operating leases
- Average borrowing cost

Liquidity

- Cash flow struc ture (fre quency of fee re ceipts, level and growth)
- ◆ Debtcoverage
- Match ing of funds

Risks

- ◆ Level of competition
- ◆ Governmentregulations

External Support

- ◆ Financial strength and support from sponsors
- ◆ Sub si dies, grants, etc. avail able to the EI

Fa heem Ah mad Presi dent & CEO, JCR-VIS Foun der, VIS Group

Fa heem Ahmad has diverse experience with in ter-

national consulting agencies in USA & Mid dle East. He has also held sen ior po si tions with lo cal in dus trial and financial groups. In 1994, he es tab lished Vi tal In forma tion Services (Pvt.) Limited, which is a leading capital market research house. VIS has the larg est data bank of cor po rate Pakistan. His ma jor re search work includes copy righted F&J fi nancial strength rankings, Musharaka Variable IncomeSecurities and stock mar ket in di ces. VIS group includes JCR-VIS Credit Rating Company Limited and News-VIS Credit In for mation Services (Pvt.) Lim ited, the first pri vate credit bureau of Pakistan. The majority of share hold ers in group com pa nies in clude the largest publication house in Paki stan and ma jor financialinstitutions.

He ob tained his B.S in Civil En gineering from NED Univer sity of Engineering and Technology, Karachi. He also has Masters degrees in Engineering and Business Administration from USA. His research work has been published in various international journals.

Ja mal Ab bas Zaidi Executive Vice President

Jamal Abbas Zaidi has more than three decades of rich experience in finance

and gen eral man age ment, at local and in ter na tional level. Prior to join ing JCR-VIS, he was CEO of a leasing mo da raba and SEVP of the then larg est leas ing company having IFC and ADB equity. Internationally, he worked for World Bank at a multi- million dollar project in Ni ge ria. Mr. Zaidi has held key positions in the indus trial and financial sector and has con trib uted many pa pers in international and local conferences and work shops. He is a mem ber of rating com mit tee of JCR-VIS.

He is a fellow member of the In stitute of Cost and Man age ment Account ants of Paki stan.

Na zia Saleem Financial Analyst

Na zia Saleem is in volved in ratings of commercial banks, invest ment banks,

in sur ance and leasing companies. Prior to join ing JCR-VIS, she worked as an equity analyst at a reputable broker age firm.

She holds a Mas ters de gree in Business Admin istration from the In stitute of Business Admin istration, Karachi.
